RAVINDRA KUMAR REDDY DONAPATI

Staff Software Engineer → Principal Engineer / Technical Architect

AI-Assisted Platform Modernization | Distributed Systems & Platform Engineering Leader

Architecting high-scale distributed systems across banking, cloud platforms, and developer productivity ecosystems

CORE COMPETENCIES

- AI-Assisted Software Delivery & Automation
- Distributed Systems System Design & Architecture
- Cloud Architecture (AWS & Azure | GCP Exposure)
- Microservices Modernization & Platform Transformation
- Platform Engineering & Developer Productivity
- DevSecOps Strategy & CI/CD Excellence
- Infrastructure-as-Code & Workflow Automation
- Kubernetes, Containers & Service Mesh
- Observability, Reliability & Performance Engineering
- High-Scale FinTech & Payments Architecture
- Program Execution & Stakeholder Leadership
- High-Performance Team Building

TECHNICAL SKILLS

- **Programming Languages:** Java | Golang | Kotlin | Python | SQL | JavaScript | TypeScript | Perl
- **Backend Frameworks & Architecture:** Spring Framework | Spring Boot | Hibernate | Node.js | Microservices Architecture | Event-Driven Architecture | Domain-Driven Design (DDD)
- **Cloud Platforms & Services:** AWS (EC2, S3, RDS, Lambda, SQS, CloudWatch, CloudFront, Route 53, EKS, Aurora) | Azure (AKS, Azure Functions, Service Bus, Application Insights, Azure DevOps) | Google Cloud Platform (GCP)
- **Databases & Data Stores:** MySQL | Oracle | PostgreSQL | AWS Aurora | Redis | ElasticSearch
- **Messaging & Streaming:** Apache Kafka | AWS SQS | Azure Service Bus
- **Containerization & Orchestration:** Docker | Docker Compose | Kubernetes | AWS EKS | Azure AKS | GKE | Istio
- **CI/CD & DevOps:** GoCD | Azure DevOps | GitLab | GitHub | Ansible | Terraform | Infrastructure as Code (IaC)
- **Monitoring & Observability:** Prometheus | Grafana | Jaeger | Datadog | Azure Application Insights | AWS CloudWatch

PROFILE SUMMARY

- Platform & Distributed Systems Architect with 15+ years of experience in **system design, API design**, and delivering high-scale platforms across payments, lending, DevSecOps, AdTech, and healthcare ecosystems
- Recognized for architecting **event-driven, microservices-based architectures** that strengthen **system resilience, throughput, security posture, and accelerated time-to-market** within **cloud-native environments**.
- Deep expertise across **AWS and Azure** (with **GCP exposure**), driving **scalable cloud platforms**, **container orchestration**, **infrastructure automation**, and modern CI/CD delivery frameworks**.**
- Proven leader in **modernizing monolithic systems into distributed architectures**, enabling **business agility**, **high availability**, and **operational efficiency at enterprise scale**.
- Skilled in building **high-performance engineering teams (5–30+ engineers)**, known for **mentoring senior talent**, strengthening **ownership culture**, and consistently delivering **complex, high-impact programs**.
- Strategic driver of **AI-assisted software delivery and platform automation**, embedding **intelligent workflows** that reduce **operational friction**, improve **engineering velocity**, and enhance **delivery quality** across organizations.

NOTABLE ACCOMPLISHMENTS

- Architected an **enterprise Internal Developer Platform integrating 10+ systems**, improving developer productivity, platform governance, and delivery efficiency across engineering teams.
- Modernized **legacy monolithic platforms into microservices and event-driven architectures**, significantly improving **scalability, reliability, deployment velocity, and operational resilience**.
- Delivered high-performance **payments platforms** supporting **IFT, NEFT, RTGS, IMPS, and UPI rails**, enabling **real-time transaction processing**, high availability, and seamless customer experiences.
- **Reduced production deployment cycles by 60%** through **CI/CD transformation, trunk-based delivery & automation frameworks**, accelerating release velocity without compromising quality.
- **Built and scaled high-performing engineering teams of up to 30 professionals**, consistently delivering complex & high-volume platforms across fintech, healthcare, enterprise domains.
- Built and supported a high-scale AdTech platform processing **4.3B+ video ads per month** across **38,000 campaigns annually**, handling large-volume distributed workloads, real-time ad delivery.
- Led and mentored **distributed engineering teams of 5–30 engineers** across multiple programs including payments, lending platforms, and enterprise platform modernization.
- Managed production systems deployed across **5 globally distributed servers (Sydney, Tokyo, Hong Kong, London, Stanford)**, ensuring system reliability, and stable global operations.

WORK EXPERIENCE

Oct 2025 – Present | ThoughtWorks | AI Software Developer Lead / Staff Software Engineer

Tech Stack: LLM-based Developer Tools, Claude Code, AI Coding Assistants, Developer Productivity Platforms, CI/CD Pipelines, Engineering Analytics, Automation Workflows

- Leading the rollout of an **AI-Assisted Software Development (AIFSD)** program across engineering teams, integrating LLM-based tools into daily development workflows.
- Implemented **Claude Code adoption** across teams, resulting in a **30% improvement in delivery efficiency** through AI-assisted coding and faster development cycles.
- Designed and implemented an **AIFSD maturity model** to track AI adoption, measure usage across teams, and guide structured expansion of AI-assisted development practices.
- Integrated **AI-assisted development tools and automation** into engineering workflows to reduce manual development effort and improve productivity across projects.
- Conducting developer training on **AI-assisted development tools, LLM usage, and clean coding practices**, enabling teams to effectively use AI in software development.

- **Workflow & Automation:** Camunda BPM | Serverless Architectures | Automated Provisioning Pipelines
- **Testing & Security:** JUnit | Spek | Test-Driven Development (TDD) | OWASP | OWASP ZAP | Security Vulnerability Testing
- **Engineering Practices:** Agile | Extreme Programming (XP) | Cloud-Native Design | Platform Engineering | DevSecOps

CERTIFICATIONS

- AWS Certified Solutions Architect
- Microsoft Certified: Azure Administrator Associate
- Microsoft Certified: Azure Network Engineer

SOFT SKILLS

- Analytical Thinking
- Problem-Solving
- Adaptability & Resilience
- Team Leadership
- Emotional Intelligence

EDUCATION

Bachelor of Technology (B.Tech) in Information and Communication Technology
Dhirubhai Ambani Institute of Information and Communication Technology, Gandhinagar, Gujarat, India — 2009

Board of Intermediate Examination
Bharateeya Junior College, Vijayawada, Andhra Pradesh, India — 2005

Jan 2024 – Oct 2025| ThoughtWorks Technologies Pvt Ltd, Bengaluru, India | Account Lead

Project: Internal Developer Portal | Client: Major UK Pharmaceutical Company| Tech Stack: Kubernetes, Azure, CI/CD (GitHub / GitLab / Azure DevOps), Terraform, Observability Stack (Prometheus, Grafana), Service Catalog / Platform APIs

- Architected an **enterprise Internal Developer Platform** integrating 10+ systems (cloud platforms, security tools, service management, observability), accelerating developer onboarding and strengthening DevSecOps governance across multiple business units.
- Introduced **self-service provisioning and workflow automation**, reducing manual approvals, improving compliance, and significantly shortening infrastructure delivery cycles.
- **Established unified observability and governance dashboards** delivering real-time operational monitoring, security insights, and cloud cost transparency, strengthening risk posture and enhancing platform reliability at scale.
- Drove platform standardization through reusable infrastructure modules, improving deployment consistency and cost control across teams.

Sep 2022 – Dec 2023 | ThoughtWorks Technologies Pvt Ltd, Bengaluru, India | Account Lead

Project: MSME Loan Application Platform | Client: Major Indian Lending Bank | **Tech Stack:** Java, Spring Boot, Microservices, Kubernetes, AWS, Kafka, CI/CD Pipelines, Observability Stack

- Architected a **scalable multi-product MSME lending platform**, integrating credit engines and CRM systems to streamline onboarding and approval workflows.
- Led **CI/CD transformation to trunk-based delivery**, cutting production deployment timelines by **60%** and accelerating feature releases.
- Modernized platform observability and reliability practices, improving operational insights and incident response.
- **Integrated Single Sign-On (SSO) with marketing partners,** enabling seamless multi-partner loan origination without requiring separate credentials for each partner channel.

Apr 2019 – Aug 2022 | ThoughtWorks Technologies Pvt Ltd, Bengaluru, India | Tech Lead

Project: Payments Platform | Client: Major Indian Private Bank**| Tech Stack:** Java, Spring Boot, Kafka, Microservices, Kubernetes (EKS), Oracle DB, ElasticSearch, AWS Cloud, Observability Stack

- Architected a **high-throughput real-time payments platform supporting IFT, NEFT, RTGS, IMPS, and UPI transaction rails,** ensuring reliable processing of mission-critical financial transactions.
- Led the **monolith-to-microservices transformation** using event-driven architecture, improving transaction scalability, fault isolation, and system resilience.
- **Implemented ElasticSearch with real-time Oracle database synchronization** for sub-second payee search across millions of beneficiaries, replacing direct database queries that degraded under peak transaction loads.
- Defined **multi-cloud infrastructure strategy across AWS and GCP** to support high-availability deployments and future-ready distributed financial services workloads.
- Designed **distributed system patterns for transaction integrity, idempotency handling, and failure recovery** in high-volume banking workloads.
- Implemented **enterprise observability (metrics, tracing, logging)** enabling faster incident detection and performance optimization across payment services.
- Built and led high-performance **teams of up to 30 engineers**, fostering engineering excellence, technical mentorship, and strong ownership culture.

Apr 2018 – Apr 2019 | ThoughtWorks Technologies Pvt Ltd, Bengaluru, India | Tech Lead

Project: Automated Pre-Approved Automobile Loans | Client: Auto Finance Platform **|** Tech Stack: AWS Lambda, AWS SQS, Java, Microservices, AWS Cloud, CI/CD Pipelines

- Designed an **AWS-native automated lending platform** delivering loan approvals within **30-minute SLA**.
- Introduced **serverless integration patterns** for legacy systems, improving scalability and operational efficiency.
- Embedded **continuous security testing and TDD practices**, strengthening platform resilience and compliance.
- Led distributed engineering teams delivering end-to-end platform capabilities.

Jun 2016 – Mar 2018 | ThoughtWorks Technologies Pvt Ltd, Bengaluru, India | Tech Lead

Project: Bahmni EMR & Hospital Management System | Client: Bahmni.org (Open-Source Healthcare Platform) | Tech Stack: Java, Spring Framework, Microservices, CI/CD, Cloud Infrastructure, Databases

- Led architecture and delivery of a **hospital management & EMR platform**, supporting clinical workflows across distributed healthcare environments.
- Built CI/CD automation and scalable backend systems enabling rapid feature delivery, platform stability.
- Mentored cross-location engineering teams, improving code quality, velocity, and ownership culture.

Jan 2013 – Jun 2016 | Pramati Technologies Pvt Ltd, Bengaluru, India | Software Engineer

Project: AdTech Platform **| Client:** AOL Adap.tv

Mar 2010 – Dec 2012 | Sapient Consulting Ltd, India | Software Engineer

Project: Integration Framework Adoption (IF) | Client: UBS Global Equities & Derivatives
Project: Risk Data Producer (RDP) | Client: UBS Global Equities & Derivatives
